

Parent Testimonial – Full Day Daycare Program

I was new in Calgary and had just moved with my family from Vancouver. My family had a history for obtaining well-rounded education for me, so I was adamant on choosing the most well-balanced daycare for my son. I visited several local daycares, and many of them were not what I was looking for. Sure, there were decent toys and some craft activities and so on, but I needed my son to be able to learn, become athletic, and develop a confident personality.

I contacted Early Foundations upon insistence from one of our friends, so I thought, why not? As soon as I called I knew this was going to be a great place. The person on the other line was prompt, courteous and answered my questions with patience and professionalism. It truly shows how good a daycare is going to be, and how well they will look after my son's wellbeing. So, naturally, I made an appointment and toured the facility.

I have to be honest, these guys have a very nice facility. Very large playground, floor to ceiling windows, this was just what I had in mind. I especially liked that kids seemed to be engaged, happy and enthusiastic about their day. But I still picked their brains about every little detail imaginable, I think it took over one hour. True to their word, I received detailed responses and finally felt these were the type of people I could trust my son's future with.

My son completed his entire year at Early Foundations and the improvements we saw in him were remarkable. He used to be shy, but unlike many stories I heard about daycares, he did not turn boisterous but rather confident and knew how to take his turn during listening and speaking. Athletics and learning was superb as well.

It goes without saying, the health and safety was excellent. These guys really go above and beyond. It does not even come across as a daycare, but a very well-functioning school. I think these guys truly love what they do.

A grateful parent of a 5 year old!
